

P.O. Wizard

Benefits

- Extremely easy to use
- Configures itself to your system setup
- Close to zero implementation effort
- Easy to customize
- Cuts down data entry time
- Eliminates re-keying errors
- Lets you automate Purchase Order preparation
- Correct errors quickly

P.O. Wizard enables users to create, validate and upload Purchase Orders (Blanket or Standard) into Oracle Purchasing. Orders can be created by importing data from another system or downloading a previous order from Oracle. Once the data is in Excel, you can use spreadsheet functionality to create the new order. It is robust, fast, easy to use, and flexible.

Enjoy the smoothest integration from your desktop to Oracle Purchasing.

Feature Overview

- Based on MS-Excel
- Control the entire process from the spreadsheet
- Forms assist with data entry validation and error correction
- Load standard purchase orders and blank purchase agreements
- Add lines to existing orders
- Load one or multiple purchase orders
- Ability to download existing purchase orders

Architecture

- Compatible with Microsoft Excel 2000 and later versions
- R11i to R12
- Uses Oracle Applications function security
- XML Web-based Communication
- No client install
- Install and setup in minutes

P.O. Header

- Data entered in the form is transferred back to Excel.
- Header Descriptive Flexfields are available.
- The payment terms default as they would in the standard purchase order form.
- Fields are color coded to indicate mandatory (yellow) or non-enterable (grey).

P.O. Lines

- Search facilities for item and category.
- All LOV fields and dependencies are validated.
- Automatically generate PO line quantity total.
- Agreement tab for Blanket PO details.

P.O. Shipments

- All LOV fields and dependencies are validated
- Pop up calendar for Promised and Need by Dates

P.O. Distributions

- Search facilities for requestor and charge account
- All LOV fields and dependencies are validated

The screenshot shows the 'P.O. Distributions' dialog box with the 'Accounts' tab selected. The 'Project' sub-tab is active. The fields are: Destination Type (dropdown), Requestor (Marlin, Ms. Amy), Deliver To Location (dropdown), Subinventory (dropdown), Quantity (5), and Charge Account (dropdown). There are 'Ok' and 'Cancel' buttons at the bottom.

a) Accounting

- Full Workflow default for Charge Account using the business rules defined in Oracle Purchasing

The screenshot shows the 'Charge Account' dialog box with the 'Segments' tab selected. The fields are: Company (01), Services Department (000), Services Account (1110), and Product (000). There are 'Ok' and 'Cancel' buttons at the bottom.

b) Project Accounting

- Search facility for Projects.
- Drop down LOVs for Tasks, Expenditure Types and Organizations
- Check Transactions against PA charge controls.

The screenshot shows the 'P.O. Distributions' dialog box with the 'Accounts' tab selected. The 'Project' sub-tab is active. The fields are: Project (dropdown), Task (dropdown), Expenditure Type (dropdown), Organization (dropdown), and Item Date (calendar). There are 'Ok' and 'Cancel' buttons at the bottom.

P.O. Download

- Ability to download data from either the purchase order or purchase order interface tables.
- Data is populated into the workbook to then be used to create new Purchase Orders.
