

## Wizard for ORACLE® Assets

More4Apps Asset Wizard is a highly productive Excel interface to Oracle Assets. Whether you are doing an implementation, migration or maintaining existing Assets; Asset Wizard can be a significant asset to your company.

### Benefits

- Increase productivity, reduce data-entry time and costs
- Increase accuracy, by validating prior to loading
- Empower end-users to load large numbers of transactions
- Reduce dependency on specialist IT resources
- Quick to implement and deliver solutions
- Consistent look-and-feel in Excel, easy to learn and use
- Compliant with Oracle Support

More4Apps offers a broad selection of Excel-based data integration products to process information with superior speed and accuracy. This provides more reliable, timely data delivery for users of the Oracle E-Business Suite who are looking for the best user experience available.

### Architecture

- Compatible with Microsoft Excel 2000 and later versions
- Oracle R11i and R12
- Uses Oracle E-Business Suite security
- XML Web-based Communication
- No client installation
- Install and setup in minutes

More4Apps **Asset Wizard** supports the following types of transactions:

- Addition
- Tax Addition
- Adjustment
- Capitalize CIP Assets
- Depreciation
- Reclassification
- Retirement
- Reinstatement
- Revaluation
- Transfer

### Asset Wizard

- Supports many of the Oracle Asset transaction types
- Data entry forms are available for each transaction type
- Forms assist with data-entry and validation (including lists of values, date formats and search functionality)
- Forms are optional, you can key / paste information directly into the worksheet
- Feedback returns to the worksheet for review
- Comprehensive download functionality for maintenance or analysis
- Familiar user interface in Excel

More4Apps Asset Wizard is a highly productive Excel interface to Oracle Assets. Whether you are doing an implementation, migration or maintaining existing Assets; Asset Wizard can be a significant asset to your company.

The comprehensive download facility can be used to extract asset information for review and correction, or as the basis for new asset information.

Extensive functionality means Asset Wizard can process many different types of transactions:

- **Addition** - create one, hundreds or even thousands of assets for your corporate books.
- **Tax Addition** - download existing assets and add them to your tax books.
- **Adjustment** - identify and download existing assets to modify descriptive and financial information.
- **Capitalize** - capitalize your CIP (Construction in Process) assets.
- **Depreciation** - adjust the depreciation expense directly for one or many assets.
- **Reclassification** - reclassify your assets on to new categories with the flexibility of selecting the assets.
- **Retirement** - retire a single asset, many assets or an entire book using cost retirements or partial unit retirements.
- **Reinstatement** - enables efficient reinstatement of retired or pending retirements.
- **Revaluation** - revalue a single asset, many assets or an entire book.
- **Transfer** - simplify and speed up asset transfers between locations, assignments and employees.

The screenshot shows the 'Additions' dialog box with the following data:

Book	ADB CORP	Asset Number	103806
Transaction Date	31/12/1998	Comment	

Asset Type: CAPITALIZED, Category: COMPUTER-SOFTWARE, In Use: Yes, Property Type: Real, Property Use: 1245, Description: PC Laptop.

**Configures to Your System Set up**

More4Apps Wizards read your system set up and configure the wizard accordingly. This means that the data-entry forms can correctly display and validate fields and flexfields (with lists of values, date formats etc).

**Comprehensive Download Facility**

More4Apps Wizards provide downloads enabling you to extract, modify and load information back into Oracle® Applications.

**Control the Entire Process from the Spreadsheet**

More4Apps Wizards are designed to be run without the need to log in the Oracle® forms. Therefore, virtually all required processes can be submitted and monitored from within the More4Apps Wizards.
