

Wizards for ORACLE® Manufacturing

Oracle® Inventory and Manufacturing rely upon getting the right data at the right time. This is a manual, time consuming and costly process. More4Apps has tools to make working with Inventory Items, Material Transactions, Cost updates, Bill of Materials and Routing data easier.

Benefits

- Increase productivity, reduce data-entry time and costs
- Increase accuracy, by validating prior to loading
- Empower end-users to load large numbers of transactions
- Reduce dependency on specialist IT resources
- Quick to implement and deliver solutions
- Consistent look-and-feel in Excel, easy to learn and use
- Compliant with Oracle Support

Architecture

- Compatible with Microsoft Excel 2000 and later versions
- Oracle R11i and R12
- Uses Oracle E-Business Suite security
- XML Web-based Communication
- No client installation
- Install and setup in minutes

More4Apps offers a broad selection of Excel-based data integration products to process information with superior speed and accuracy. This provides more reliable, timely data delivery for users of the Oracle E-Business Suite who are looking for the best user experience available.

More4Apps offer the following products to support your Manufacturing Processes:

- Bill of Materials Wizard
- Item Cost Wizard
- Item Wizard
- Materials Transaction Wizard
- Routing Wizard

Bill of Materials

- Creates or updates Engineering and Manufacturing Bills of Materials
- Maintains large amounts of bill components and reference designators with ease
- Download Bills of Material; modify and upload back to Oracle
- Downloads and Explodes Bills of Material
- Supports 'Where Used' queries
- Supports Alternative and Common Bills of Material
- Supports Delete Groups
- Support Engineering Prototype Changes

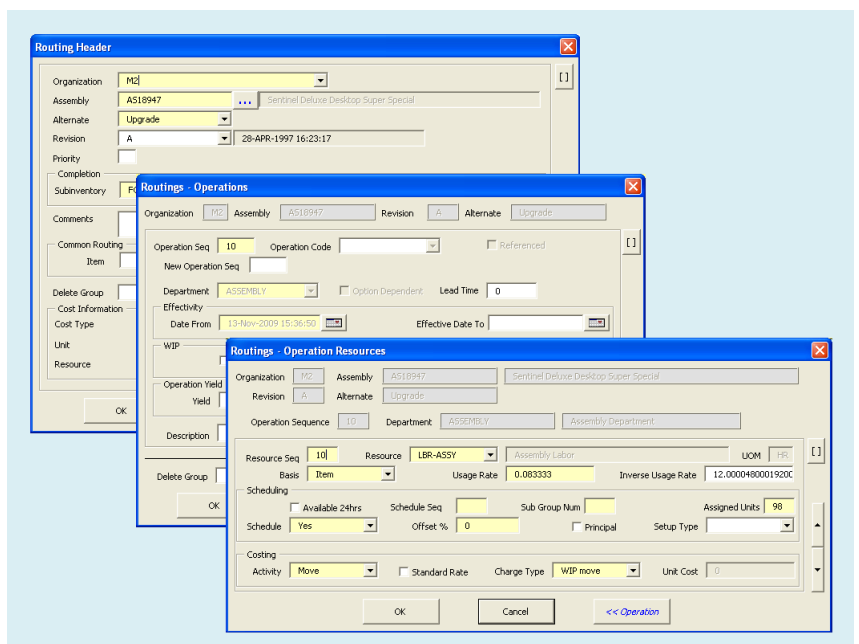

Whether you've just begun implementing or have been using Bills of Material (BOM) in Oracle for some time, then it's crucial that the data is updated in a timely fashion. Bill of Materials Wizard is the time reducing tool for creating, updating and deleting Bills of Material for Oracle Manufacturing and Engineering.

Entering data into Oracle manually or using a keystroke macro based tool is an error prone time-consuming process. More4Apps Routing Wizard is the best solution for all your Manual Routing creation and update needs. It allows you to upload and download your routings to and from Oracle's Bills of Material module using Excel. More4Apps Routing Wizard is robust, accurate and flexible.

Routing Wizard

- Maintains large amounts of Routing Operations and Resources with ease
- Supports Alternate and Common Routings
- Downloads with advanced capabilities, including a range of routings
- Manages validation
- Supports Delete Groups and Deleting of resources
- Powers speedy entry of new or updated Routings

Materials Transaction Wizard

- Creates Inventory Transactions
- Assigns Transactions to Manufacturing Projects
- Supports WIP Job component and assembly transactions
- Supports Project Borrow / Payback and Transfers
- Supports Lot and Serial Controlled Items
- Coming Soon: *Support for Move Order Transactions*

Item Wizard

- Validates and creates Inventory Items
- Supports category and catalog loads
- Copy from item or template
- Generates, automatically item part numbers with customizable PL / SQL package

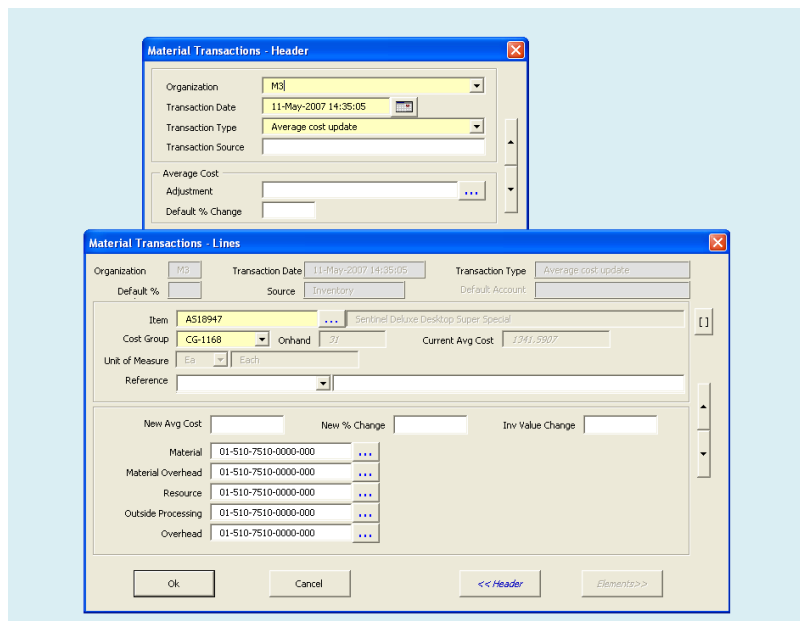

Item Cost Wizard

- Validates and creates Standard Cost updates
- Downloads cost, on hand quantity valuations
- Downloads last invoice / PO Prices

Material Transaction Wizard is an indispensable time reducing tool which takes the pain and frustration out of inventory, average cost updates, project manufacturing and WIP job transactions. More4Apps Material Transaction Wizard provides a custom account generator for miscellaneous transactions.

Download seed transaction data for on hand quantities, transaction history, bills of material, WIP jobs and requisition templates.

More4Apps Material Transaction Wizard is the ideal tool to empower users to load on hand quantities for go live.

Item Wizard makes creating and maintaining items in Oracle Inventory a breeze. More4Apps Item Wizard is an indispensable, time reducing, all-in-one tool, taking the pain and frustration out of data conversion and item creation.

Define the columns and tab groups you want to use, setup different templates for different users so they can only create data for certain tab groups.

Download items from Oracle E-Business Suite into Excel to make updating a range of items a simple task.

Item Cost Wizard is the perfect tool to take the pain and frustration out of creating and updating standard costs in Oracle E-Business Suite. This wizard allows you to make updates to the material sub element level.

More4Apps Item Cost Wizard provides quick and useful download options to make updating costs a simple task

Configures to Your System Set up

More4Apps Wizards read your system set up and configure the wizard accordingly. This means that the data-entry forms can correctly display and validate fields and flexfields (with lists of values, date formats etc).

Comprehensive Download Facility

More4Apps Wizards provide downloads enabling you to extract, modify and load information back into Oracle® Applications.

Control the Entire Process from the Spreadsheet

More4Apps Wizards are designed to be run without the need to log in the Oracle® forms. Therefore, virtually all required processes can be submitted and monitored from within the More4Apps Wizards.
